Junior Full Stack Developer

Motivated and detail-oriented developer with practical experience in building web applications using modern front-end and back-end fundamentals. Skilled in creating clean, responsive interfaces and developing simple yet effective server-side logic. Currently working as a freelancer since September 2024, delivering tailored solutions and collaborating directly with clients to understand requirements and build functional products.

Strong understanding of web basics including **HTML**, **CSS**, **JavaScript**, and foundational back-end development using **React.js**, **Node.js** and **Express**, with familiarity in working with **MongoDB** or **MySQL**. Passionate about continuous learning, improving code quality, and becoming part of a professional team where I can contribute, grow, and develop my skills further.

Education

Horus University (HUE)

August 2025 - Present

Applied Health Sciences Technology

Bachelor's Degree
